

Bike Operation

1. Place the bike on flat ground. Grass is okay.
2. The rider must wear shoes. The Beach Cruiser bike is suitable for riders aged 7+ years. The BMX bike is for riders aged 5-10 years.
3. Adjust the seat height to be level with the riders' hips. Do not raise the seat above the minimum insert line.
4. Place liquids into the jug first followed by other ingredients.
5. Make sure that the drive is stopped before placing the jug on the front of the bike.
6. Attach the rubber cord over the jug and hook into the hole underneath the jug base.
7. Instruct the rider to pedal for 30 seconds (this is an arbitrary length of time, go with the reaction of the crowd and have a bit of fun).
8. If the blades aren't spinning inside the jug, ask the rider to stop peddling. Grab the front wheel by the tyre and move it forwards and backwards three times. This will flick stuck ingredients out from under the blades.
9. Do not submerge the jugs in dishwasher. Hands wash only. We recommend using a jug for each flavour you are making so that you don't have to clean after every use. Periodically place 500mls of clean water into the jug and use the blender bike to clean the jug. Wipe down the outside of the jug.
